ICPJ's Unnatural Causes Screenings - Host Agreement

The Interfaith Council for Peace and Justice is honored to promote the powerful PBS documentary *Unnatural Causes*. This film explores how population health is shaped by the social and economic conditions in which we are born, live, and work. Through portraits of individuals and families across the United States, the series reveals the root causes and extent of our alarming health inequities and searches for solutions. Along the way it confronts the inadequacy of conventional explanations like genetics, individual behaviors, or even access to quality health care.

Our Goal: to bring people together to expose them to the Unnatural Causes film and empower them to take meaningful action for justice on health issues within their communities.
